-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I in the reply filed on 6/26/06 is acknowledged.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 8/30/03 has been considered by the examiner. Form 1449 has been signed and returned with this office action. The examiner would like to point out that several of the items on sheet 1 of the IDS have not been considered, as the given patent numbers do not correspond with the inventor name and dates.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-22 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed invention appears to be all

directed a software or code and as the claims read there is no practical application or tangible result achieved by the claimed invention. In this instance, all of the elements would reasonably be interpreted by one of ordinary skill in light of the disclosure as software, such that the system/apparatus is software. A claim to a data structure: a) which is not stored on an appropriate computer readable medium; and/or, b) fails to meet the IEEE definition of a data structure, and methods where the result is an abstract idea (thought or computation) rather than a tangible result is not statutory. It is not relevant whether the steps are computer implemented or not; the question is whether a practical application is being claimed. Based on applicant's disclosure especially pages 42-44 of the Specification, it would appear to the examiner that only the software is being claimed.

The examiner invites applicant to call to discuss appropriate claim language for applicant's invention.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

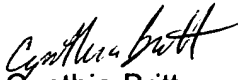

U.S. Patent No. 6,781,898 and 6,917,548 by Kim et al.

These patents teach repairing consecutive bit errors in memories using BIST.
